Cane Furniture India Weave

MATERIAL

Cane Furniture India Weave is a fibre made from highly durable, solution-dyed polyethylene (PE), which is ideal for outdoor use, because it withstands moisture and large variations in temperature. Both the structure of the fibres and the weave ensure elasticity and optimal sitting comfort. The durable material is UV-resistant and requires minimal maintenance. Cane Furniture India Weave has been developed to withstand climate conditions all over the world and the material will retain its colour and shape for many years. All products are hand-woven with the Cane Furniture India Weave fibre, which can vary slightly in colour, creating a nice contrast in the surface of the weave. This gives the furniture a unique, natural and exclusive look.

MAINTENANCE & CLEANING

Because the product is used outdoors over extended periods of time, regular cleaning with a soft brush and soapy water is important. This ensures the removal of superficial soil and debris, such as leaves, berries, pollen and bird droppings, before they have a chance to build up and become more difficult to remove.

Alternatively, the product can be cleaned with a high-pressure cleaner set at moderate.

Cane Furniture India Tex

MATERIAL

Cane Furniture India Tex is a coated polyester material, which is ideal for outdoor use and requires minimal maintenance. Cushions made from Cane Furniture India Tex come with a Quick Dry Foam core, ensuring maximum drainage and air circulation. This allows the cushions to dry faster after having been exposed to rain and moisture. The Quick Dry Foam core also has an anti-bacterial protection, reducing the risk of mould and mildew forming on the cushion.

MAINTENANCE & CLEANING

Because the product is used outdoor over extended periods of time, regular cleaning with a soft brush and soapy water is important. This ensures the removal of superficial soil and debris, such as leaves, berries, pollen and bird droppings, before they have a chance to build up and become more difficult to remove.

It is important to place your cushions in an upright position when not in use. This ensures optimum drainage, thereby minimising the risk of mould and mildew. The anti-bacterial protection in the cushion core is most effective with correct drainage of the cushion.

Please note, that despite the anti-bacterial protection, mildew can still form between the inner and outer covers, if the cushion is not properly drained or cleaned. In case of food or drink spills, wash the spot immediately with warm soapy water and allow the cushion to dry in an upright position. White Cane Lines Tex®: White furniture is more delicate and prone to staining and thus requires more regular cleaning.

The exclusive outdoor teak furniture is different than other furniture. The frame of teak version is a little wider which gives it a more robust, but also a warmer look. Teak is a strong wood which has the quality to withstand a great deal of wear and tear, as well as different temperatures and weather, even untreated. However, the best part of this material is its beauty. The natural, rich color, texture and quality of the wood are simply gorgeous. The robust teak frame holds the seated area in suspension. Due to the comfortable cushion wrapped with vibrant Sunbrella fabrics, it adds beauty to it. Cushions to complete the feeling of comfort and style. However, the furniture also to be used without a cushion. Coordinating cushions in fabric is available in several colors, which allows the teak furniture to be crafted to your own individual style and optimize your personal visual and physical ideals. The teak frame give these outdoor furniture an ultra-modern but warm look and when used outdoors, offer an excellent contemporary outdoor experience & ambiance.
